EXPERIENCE

BNP Paribas – CTO Office

IT Production - Project Manager (contract)

Jersey City, NJ

Jul 2024 – Present

- Americas PM for several Information Security projects to deploy solutions in compliance with NYDFS NYCRR pt. 500
- Coordinated the infrastructure hardening of 15+ technologies aligning with CIS V8, DORA (EU), and BNPP Group SOPs
- Admin of a Power BI workspace for CTO Office, managing CI/CD & ETL processes to enable sub-teams to deploy dashboards
 - Enabled rapid decision making for leadership by visualizing the IT Production organization's Capital Expense budget

Selected Achievement: Closed out a high-impact, flagship project to implement microsegmentation (zero-trust) solutions across production environments of all core/business applications, hosted on ~1,500 physical servers across the Americas

- Demonstrated technical expertise by navigating project through several infrastructure roadblocks: low latency applications, multiple applications per server, multicast/UDP traffic application requirements, etc.
- Revamped workstreams to adapt for a growing scope due to virtualization delays coinciding with stringent regulatory deadlines
- Expertly managed leadership relationships in a global IT landscape to ensure high-risk deliverables are prioritized and achieved

BNY Mellon – Investment Management

Core Engineering – IT Project Coordinator

Jersey City, NJ

May 2023 – Dec 2023

- Conducted User Acceptance Testing & Quality Assurance for a high-impact project impacting **450+ applications**
- Developed a Power BI dashboard to monitor Core Infrastructure OS version compliance and remediation plan KPIs & trends

Selected Achievement: Coordinated the enterprise-wide remediation of OS/software to ensure active vulnerability management

- Accelerated timeline by **25%** through identifying **15+** shared software constraints between various application teams
- Reduced project backlog by **60%** by identifying misassigned tickets and creating corrective workflows in ServiceNow to automate ticket assignment with included verification check points
- Eased remediation pain points for product teams by automating **90%** of action plan reporting with Excel VBA macros

EDUCATION

Texas A&M University – College of Engineering

B.S. Technology Management, Minor in Business Administration

College Station, TX

May 2024

Certifications:

- **CompTIA Security+** [Verification ID – ZYQZ2EP61FQQ1R5L \(IAT Level II\)](#)
- **PeopleCert ITIL 4** [Verification ID – GR671506197AJ](#)

Undergraduate Achievements:

- **Urban Resiliency. AI Laboratory – Research Assistant**
 - Developed Python scripts to clean & query data for LLM training in collaboration with Dr. Ali Mostafavi on the following project: Disaster Informatics Solutions: Integrating Human and Machine Intelligence for Resilient & Smart Emergency
- **Software Development Optimization – Student Researcher**
 - Developed a CI/CD pipeline framework in collaboration with Dr. David Sweeney, finding critical stages where ITIL 4 practices can be applied to ensure secure software development and achieve >99% uptime

SKILLS

Technical: PowerShell/Bash, Python, Linux, Git, Go, R Programming, SQL/NoSQL DBA, Redis, Containerization, APIs, HTML

InfoSec Tools: Tanium, Illumio, Nexpose, CyberArk, MS Intune, Phosphorus, SailPoint, Nessus, Splunk, MS Sentinel, Dynatrace

Security Frameworks/Concepts: NYCRR 500, NIST SP-800, CIS V8, COBIT, MITRE ATT&CK, DevSecOps, IAM, Zero-trust

Business Intelligence: Power BI & Excel VBA (Expert), Kibana, QlikView, Tableau, ServiceNow, Jira, Confluence, SharePoint, DAX

Soft Skills: Technical Concept Translation, Executive/C-Suite Reporting, Relationship Management, Time Management, Organization
