Information Security Specialist | New York, NY | 908.274.4615 | austin.logan.john@gmail.com | [LinkedIn](#)

EXPERIENCE

BNP Paribas – CTO Office – IT Production

Safety & Trust (S&T) – Project Manager/Business Analyst

Jersey City, NJ

Jul 2024 – Present

- AMER region SPOC/lead PM for several network security projects to ensure compliance with NYDFS' NYCRR part 500
- Orchestrated as lead project manager, the network micro-segmentation of **250+** applications hosted on **3,000+** servers
- Implemented **75+** security controls for CIB assets, aligning with **CIS Version 8** guidelines for **27+** core tools/technologies
- Admin/Owner of a Power BI Report server for CTO Office, managing CI/CD & ETL processes to enable sub-teams to deploy dashboards as needed
 - Visualized a **€100M** IT Capital/Operational Expense budget, utilizing DAX/VBA/Python to query real-time data from various procurement & accounting systems and calculate meaningful KPIs for management

Selected Achievement: **Implementation of a high-impact, zero-trust network solution on critical trading & payments platforms**

- Overcame **low-latency roadblocks**, mitigating performance impacts while delivering project goal by facilitating the in-house development of a workaround solution, collaborating cross-functionally & globally with Production Security/Application teams
- Expertly managed global office politics & relations to ensure deliverables are prioritized across the bank and achieved on time

BNY Mellon – Pershing – Investment Management

Core Engineering - IT Project Coordinator

Jersey City, NJ

May 2023 – Dec 2023

- Conducted User Acceptance Testing & Quality Assurance for a high-impact project impacting ~**450+** applications
- Developed a Power BI dashboard to monitor Core Infrastructure OS version compliance and remediation plan KPIs & trends

Selected Achievement: **Coordinated the enterprise-wide remediation of OS/software to ensure active vulnerability management**

- Accelerated timeline by **25%** through identifying **15+** shared software constraints between various application teams
- Reduced backlog by **60%** by identifying misassigned tickets and creating corrective workflows in ServiceNow to automate task assignment to regional developer/infrastructure teams
- Eased remediation pain points by automating **90%** of action plan reporting with custom Excel Macros/functions

EDUCATION

Texas A&M University – College of Engineering

B.S. Technology Management, Minor in Business Administration

College Station, TX

May 2024

Certifications:

- **CompTIA Security+** [Verification ID – ZYQZ2EP61FQQ1R5L \(IAT Level II\)](#)
- **PeopleCert ITIL 4** [Verification ID – GR671506197AJ](#)

Undergraduate Achievements:

- **Urban Resiliency. AI Laboratory – Student Researcher**
 - Developed Python scripts to clean & query data for LLM training in collaboration with Dr. Ali Mostafavi on the following project: Disaster Informatics Solutions: Integrating Human and Machine Intelligence for Resilient & Smart Emergency
- **Software Development Optimization – Student Researcher**
 - Developed a CI/CD pipeline framework in collaboration with Dr. David Sweeney, finding critical stages where ITIL 4 practices can be applied to ensure secure software development and achieve >99% uptimes

SKILLS

Technical: PowerShell/Bash, Python, Linux, Go, R Programming, SQL/NoSQL, Redis, Docker, REST APIs, Nessus, Low Latency

InfoSec Tools: Tanium, Illumio, Nexpose, CyberArk, Dynatrace, Kona (anti-DDoS), Apigee, MS Intune, Phosphorus, SailPoint

Security Frameworks/Concepts: NYDFS NYCRR, NIST SP-800, CIS V8, COBIT, MITRE ATT&CK, DevSecOps, IAM, Zero-trust

Business Intelligence: Power BI & Excel VBA (Expert), Kibana, QlikView, Tableau, ServiceNow, Jira, Confluence, SharePoint, DAX

Soft Skills: Technical Concept Translation, Executive/C-Suite Reporting, Relationship Management, Organization/Time Management
